- Kõige rohkem võttis aega otsingu lehe laadmine. Selle põhjuseks on ilmselt seal olev google maps. (keskmiselt 616 ms)
- Järgmisena keelevahetus. See suunab pealehele, seega sinna juurde tulevad veel avalehe pildid. (keksmiselt 507ms)
- Kiiruse poolt järneb neile sisse logimine. (keksmiselt 351 ms)

Kokkuvõttes tundub kõik normaalne ja hetkel otsest optimeerimise vajadust ei näe.
